Credo

I updated my home page immediately following Rosh Hashana, September 2026 (Hebrew: *Tishrei 5787*), where *Rosh Hashana* marks the Jewish New Year that is a solemn day of prayer, introspection, and atonement that is quite the opposite of the secular New Year that is typically marked by a day of frivolity. Over the holiday I read a short book The Eternal Conversation by former UK chief rabbi Lord Rabbi Jonathan Sacks (o.b.m. 1948-2020) who was recognized by many, and not only by Jews, as being an eminent moral philosopher. In "Letter 4" on "The Pursuit of Happiness" p. 58, he wrote that it would be considered **madness** to deliver a eulogy where one stated that the deceased "*Mr. X, what a man he was. He drove a Lamborghini, dressed in Armani, wore a Patek-Philippe, had a villa in Cap Ferrat, and a pied-a-terre in Mayfair. This was a giant. We shall not see his like again*."

Therefore I feel compelled to write a short paragraph about what is very important to me, and hopefully what others recognize about me:

1. I am a proud *Torah* observant *God-fearing* Jew.
2. In 1983 the *best* life decision that I made was coming on *Aliyah* (English: immigrating to *Eretz Israel*, the Land of Israel) as a young man, with a young wife, and the older two of my then infant children. The decision was beneficial *both* spiritually and professionally. I see that "*Hashem* watches over the Land, where the eyes of *Hashem* are always upon it, from the beginning of the year until the end of the year" (Deut. 11:12). (The Hebrew word *Hashem*, in English literally the "Name", is the term that most Jews traditionally have used from time immemorial when referring to the ineffable name of God).
3. During the 15 years that I served in an IDF reserve combat unit in a command position, I grew *both* spiritually and personally. And I must add, *emphatically to the contrary of the Hareidi "grasshoppers"*[7] *(i.e. the so-called "ultra orthodox") view*, that **joining the IDF enhances one's spiritual growth**.
4. In a number of instances I had the opportunity to follow the fundamental "marching orders" that *Hashem* gave to *Avraham Avinu* (English: our forefather Abraham), namely "to keep the ways of *Hashem*, to execute righteousness and justice" (Gen. 18:19), and to teach my children accordingly.

Footnotes

1. **Secure Photos:** My purpose is to protect my internet privacy by inserting "speed bumps" in front of applications that attempt to automatically harvest my photo and email address, while not making it difficult for a human reader of my site to access this data; unlike many others whose goal is to refuse to reveal their on line email address at all. My techniques are "good enough" to prevent a "typical" automated mass harvesting application from accessing this data. The above techniques camouflage my image from comparison with CCTV surveillance photos yet cannot stop my young grandchildren from easily identifying me. The camouflage is generally more effective when defending against searches through a mass database of photos as opposed to comparing against a known reference photo.
   - Similarly any human can easily read my distorted email watermark although admittedly there are some AI tools that can decipher it too. And admittedly there are applications that can automatically extract my email address directly from the QR code mailto halftone URL, but they also could have more easily extracted it by simply parsing the top line of my home page which uses the trivial textual description of my email address using the well-known "AT" and "DOT" notation hack.
   - Additionally I have protected my email address against an automated HTML parse by inserting an embedded "invisible" CSS bogus email address which would likely trip up a typical automated harvester, e.g. `<span style="display:none">bozo@the-clown.com</span>`. There are many other CSS hacks that could be used.
   - I camouflaged my photo using the *FOSS* GIMP blurring filters (i.e. "oilify" and "clothify") while overlaying the result with my "rippled" email address as a large visible watermark which I have strategically placed to obscure my nose tip and my nostrils which are important feature metrics. The camouflaged photo provides a "kind of" two factor authentication (2FA) because if any rogue site were to post it then any skeptic could easily question it by sending me an email.
   - There are commercial de-identification (D-ID) applications which obscure photos with nearly unobservable distortion where the obscured photo would intentionally fail to pass high quality photo ID techniques such as a passport scanner.
   - An interesting new *FOSS* D-ID technique (patentable?) would be to inject a barely visible Eurion currency watermark into a photograph, because an Eurion currency watermark would render such a photograph uncopyable by all commercial imaging software for fear that currency is being counterfeit.

2. **Tekoa:** Contrary to most of the world's claims referring to Tekoa as an "internationally unrecognized illegal settlement", Tekoa was originally established by the Kingdom of Israel before the time of King David c. 1000 BCE. The *Tanakh* (English: Hebrew Bible) states that (1) King David fled to Tekoa when King Saul was pursuing him, (2) King David was convinced by the "wise woman" of Tekoa to pardon his son *Avshalom*, and (3) the prophet *Amos* was from Tekoa.↩

3. According to the **UN Partition Plan for Palestine of 1947**, the Judea and Samaria regions (a.k.a. the so-called "West Bank") were awarded to the modern State of Israel but were *illegally occupied* in 1948 by the State of Jordan, with critical military assistance from the British Army led by Glubb "Pasha". At that time only two UN states recognized Jordanian sovereignty, namely Britain and Pakistan. In 1967 the State of Israel liberated the regions as a result of their miraculous Six Day War victory. Perversely almost no country in the world has recognized Israeli sovereignty since. Even today after 60 years, Britain leads the Western world's campaign against recognizing Israel's *Six Day War* victory, e.g. against recognition of Israel sovereignty over the *Ma'ale Adumim* region around the E1 corridor. In 1917 following Britain's victory over Turkey in WW I they announced the Balfour Declaration in which they declared their intention to establish a homeland for the Jewish People in Palestine in the spirit of Jeremiah's prophecy (chapter 31) which states that "in the end of days" the Jews will return to *Eretz Yisrael*. As a result, in 1919 the League of Nations (i.e. the precursor to the modern United Nations) awarded Britain the Mandate for Palestine. Yet in 1939 as the Nazi Holocaust (Sho'a) came into "full swing", Britain made a *volte face* and issued the White Paper to strictly limit Jewish immigration to Palestine which effectively condemned at least hundreds of thousands of Jews to death. In 1946 UK's then Foreign Secretary Ernest Bevin publicly acknowleged that the *Partition Plan* was unsolvable because even though the Jews were willing to make land compromises, theologically the Arab Moslems would never accept any form of Jewish sovereignty which is still their position to this very day 80 years later, i.e. 2026! (Arafat admitted in 1994, shortly after he signed the Oslo Accords, in his Johannesburg Address in Arabic, that the *Oslo Accords* were a *ruse* exactly in the spirit of Muhammad's *tactical* Treaty of Hudaybiyyah in 628 CE which he shortly breached that enabled him to slaughter the tribe of *Qurayash*). Neither the *Goyim* nor "progressive" Jews can acknowledge this fundamental truth, hence their nonsensical and typically antisemitic hankering after the so-called Two State Solution. It should be wrily noted that as of 2026, the once "Great" Britain still administers 14 *illegal colonies* across the world (not including Scotland, Wales, and Northern Ireland!), thousands of kilometers away from the British Isles. May *Hashem*, the God of Israel, send a plague to the antisemitic perfidious Albion along with their Western European, and now also Canadian, cheer-leaders.↩

4. **Hebrew University (HUJI):** HUJI is internationally rated as one of the top 100 universities in the world. By 2024 many Jewish students, many of whom had previously barely identified with Judaism or the Jewish community, found university environments in the Western world literally unviable for Jews, and instead have chosen to attend universities in Israel, which by the way are a fraction of the cost of comparable US and Canadian universities. Since October 7 2023 when the Gazan Muslim terrorists massacred 1200 Jews, and imprisoned and tortured another 250 for nearly three years in subterranean tunnels, there was a concerted outbreak of world-wide antisemitism in nearly all Western countries in support of the Islamic barbarians, reminiscent of the Nazi Germany *pogroms* against the Jews in the latter half of the 1930's for which the Western world remained obsequiously silent; prior to the Nazi's genocidal annihilation of 6 million Jews from 1940-45 in the Holocaust (Sho'ah), for which the Western world again remained silent *while it happened*. Since 2023 the hubs of the antisemitism were in universities especially among the elite ones, while the civil legal authorities originally refrained from disturbing "academic freedom of expression". In the US the heads of the top universites refused to condemn the antisemitic violence. The Secretary General of the UN, António Guterres, infamously refused to condemn the Gaza massacre in which over 100

UNWRA employees participated, and where UN sites were used as terrorist bunkers and arms caches, although the West "righteously" howled when Israel attacked these UN sites in self-defense (in spite of uniquely minimal collateral damage while the Islamic terrorists used *theologically mandated* "human shields"). Subsequently Israel declared the *UNWRA* organization as *persona non grata*.↩

5. **Hadassah Hospital:** Hadassah is internationally rated as one of the top 150 hospitals in the world. Arab Muslim militias massacred a convoy of about 80 of Hadassah's medical staff in April 1948. The convoy was flagged by the ICRC. The British Mandate authorities were informed of the details of the convoy, but they turned a blind eye to the massacre, and prevented Jewish militias from rescuing the staff. A British soldier informed the Arabs of the timing of the convoy. During the 1940's (i.e. during WW II and afterwards) the British Army medical corps used Hadassah for seminars on tropical diseases. According to the UN Partition Plan for Palestine of 1947, Mount Scopus (Hebrew: *Har Hatzofim*) in "East Jerusalem" where the hospital was originally located, was awarded to the modern State of Israel. As a result of the massacre, the Hadassah campus on Mount Scopus was forced to close. In 1961 a new campus was opened in the West Jerusalem suburb of Ein Kerem. In 1967 the Mount Scopus campus was renovated and reopened.↩

6. **Mitzpeh Yericho:** Contrary to most of the world's claims referring to it as an "internationally unrecognized illegal settlement", the *Tanakh* (English: Hebrew Bible) states that the city of Jericho was Joshua's first conquest (from the heathen Canaanite idolators and practictioners of human sacrifice) when the Jews first entered *Eretz Yisrael* c. 1273 BCE, 40 years after their Exodus from Egypt.↩

7. **Hareidi Grasshoppers:** In light of the *Hareidi* refusal to participate in the Jewish People's *existential war* (Hebrew: *Milchemet Mitzva*) against the Amalek inspired Hamas massacre on October 7 2023, the *Hareidim* are acting exactly in the same spirit as the generation of unfaithful *Hagavim* (English: grasshoppers), see Numbers 13:33, who did not feel they were capable of or *even obligated* to fight for *Eretz Yisrael*. *Hashem* punished their generation to die in the Sinai wilderness over a 40 year period instead of allowing them to enter the *Promised Land*, and whose baseless crying on that night for fear of fighting for *Eretz Yisrael* caused the Jewish People to undergo thousands of years of subsequent tragedies. Even during the *Sho'ah* (English: Holocaust) *Hareidi* Jews who were physically capable joined partisan groups or Warsaw Ghetto fighters, and similarly during the Israeli War of Indepence in 1948 most *Hareidim* who were physically capable joined the war effort, especially in light of Rav Shlomo Zevin's exhortation quoting *Moshe Rabbenu* (English: our teacher Moses) when addressing the tribes of Gad and Reuven, reminding them that "your brothers are going out to battle, while you sit here" - see Numbers 32:6. The current generation of *Hareidi* rabbinic leadership has literally gone *mad*, so much so that they would rather join a coalition of leftist parties that will rely upon Arab party *Knesset* support where the Arabs would obviously be delighted that no one be required to join the army.↩
